

GENERAL CRANE SAFETY REFRESHER

COURSE LENGTH: 8 hours (1 day)

CLASS SIZE: 12-25 students

TARGET AUDIENCE: *Personnel who are qualified to operate Mobile, Portal, Floater, Locomotive, and Hammerhead cranes. This course satisfies requirements for those also qualified to operate Overhead Electric Traveling Cranes.*

SYNOPSIS: This course is designed to review the requirements for the safe operation of various types of cranes from the smallest to the largest. Emphasis is placed on the individual responsibility to know the equipment and safety requirements for each specific make and model of crane. This course highlights the main points from the initial safety course. Emphasis is placed on preventing crane accidents by reviewing recent accident examples and lessons learned. This course is a prerequisite for re-licensing for all DON personnel and provides increased safety awareness for those who are qualified to operate cranes full time or part time.

PREREQUISITES: Qualified Crane operator
