MEMORANDUM

19 August 1947

From: 390
To: 300
400

Subj: Fuel Oil from U.S.S. INDEPENDENCE, Disposal of

1. Samples from a quantity of 1200 gallons of fuel oil pumped to an oil ring from the bilges of the subject vessel have been analysed radiochemically by the Radiation Laboratory.
2. The results of the radiochemical analysis indicate that this fuel can be burned in the Shipyard Power Plant without radioactivity hazard under the same conditions as prescribed for the GASCONADE fuel oil.
3. It is requested that the Radiation Laboratory be advised on completion of burning of this fuel in order that the boiler used can be monitored as a double check on safety.
